Ability Fabricators Incorporated is one of Canada's largest standard and custom stainless steel manufacturers. Operating out of a fully equipped manufacturing facility, we focus our attention on unparalleled quality and service. With over 150 years of combined manufacturing experience, the Ability Advantage lies in providing solutions from engineering to installation.

We fabricate to industry standards which includes TSSA, CWB, CSA, GMP and NEMA4.

Handling all of your process equipment needs we specialize in Blenders, Lifts, IBCs, Receiving & Discharge Stations, Platforms, Conveyors, Air Plenums, Clean Room products, and other industry specific equipment.

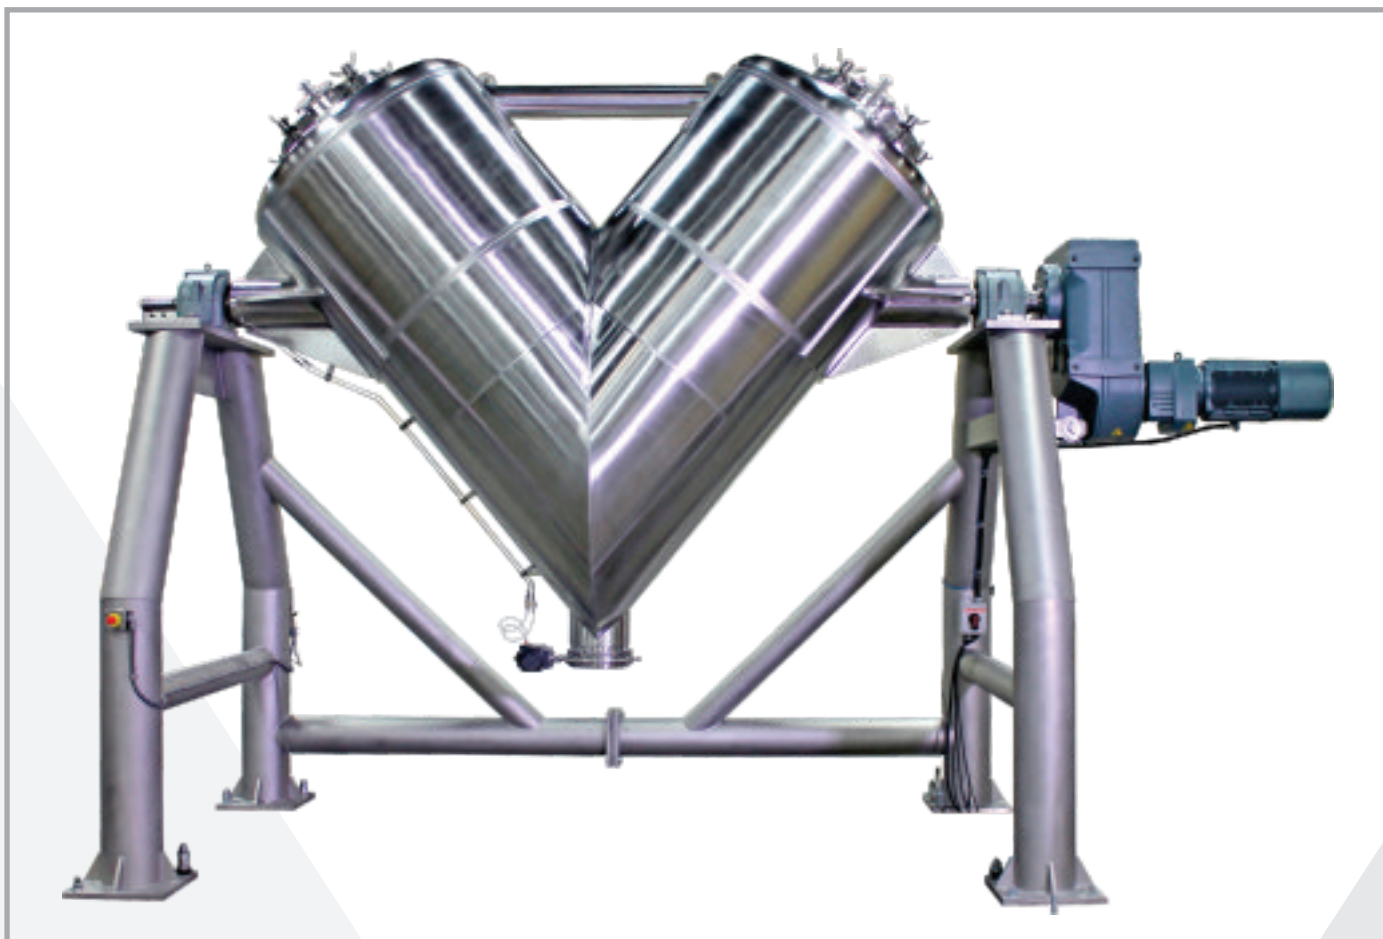

In-House Services:

Designing & Engineering,
Fabrication & Assembly,
Machining, Welding,
Finishing, Quality Control

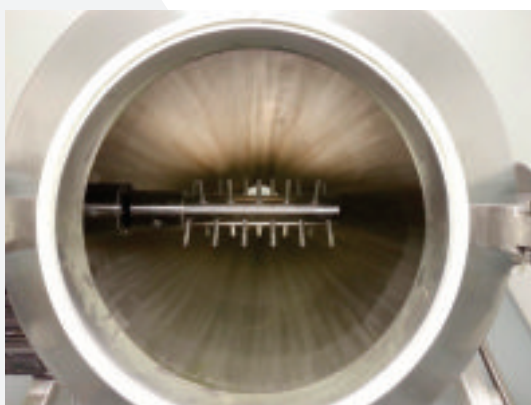

Industries Served:

Pharmaceutical,
Nutraceutical, Food &
Beverage, Chemical,
OEM & Others

AFI V-Blender

- Designed for your blending needs for all free-flowing solids
- Ideal for Pharmaceutical, Nutraceutical, Food and Chemical industries
- Efficient blending with no material accumulation; enabling easy discharge
- Supports liquid addition with high speed intensifier bars
- Available in mobile, tabletop configuration to large scale production units

Customizable Options:

- Small batch capacity (2-44) qt
- Liquid addition
- CIP systems
- Intensifier bars
- Production capacity (5-125) cubic ft
- Valve type
- Material type (304/316)
- Finishes

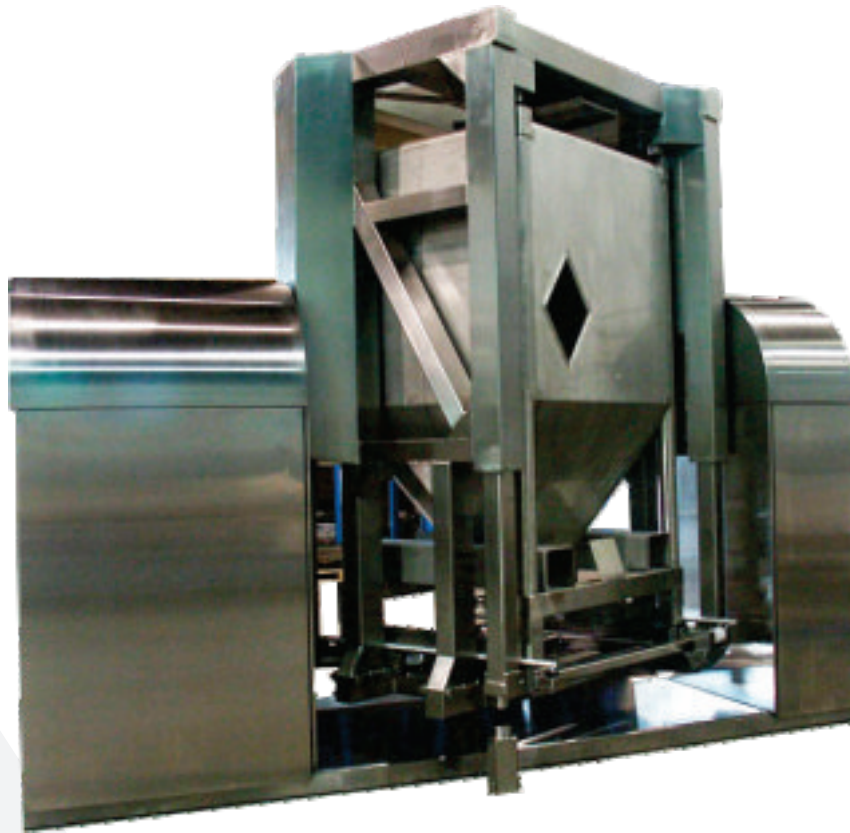

AFI Double Cone Blender

- Engineered to ensure an efficient homogeneous mix of granules and powders
- Ideal for Pharmaceutical, Nutraceutical, Food, Cosmetic and Chemical industries
- Stainless Steel construction custom made as required
- Efficient blending with no material accumulation; enables easy discharge
- Available in tabletop configuration to large scale production units

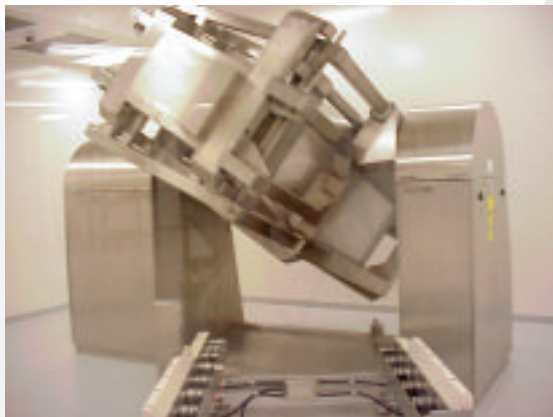

Customizable Options:

- Small batch capacity (2-30 qt)
- Liquid addition
- CIP systems
- Intensifier bars
- Production capacity (2-100) cubic ft
- Valve type
- Material type (304/316)
- Finishes

AFI IBC Tumbler Blender

- Perfect solution for Pharmaceutical, Nutraceutical and Food Industries
- Bin Blending is the best choice when working with multiple products
- Available in portable lab size to full production scale

Customizable Options:

- Clean, CGMP design
- Variable blending speed
- Single & double pedestal
- Electric drives
- Full PLC based control
- Safety gates
- Pneumatic bin clamp
- Automatic & manual loading

AFI Ribbon Blender

- Perfect blending solution for Pharmaceutical, Nutraceutical, Food and Chemical industries
- Ribbon Blenders have a U-shaped horizontal trough and two helix ribbon agitators
- Engineered to provide a triple mixing motion for quick and efficient blending
- These blenders facilitate material movement without any dead spots and ensures easy product discharge

Customizable Options:

- CIP systems
- Valve/ Tilt Discharge
- Production capacity (2-100) cubic ft
- Valve type
- Material type (304/316)
- Finishes

AFI Lifts

- Ideal for Pharmaceutical, Nutraceutical, Food& Beverage, Cosmetics and Chemical industries.
- Customized lifting for all your material handling needs
- We offer a wide range of Drums Lifts, Bin Lifts and Vacuum Lifts and other custom application Lifts
- Perfect for both mobile and stationary applications

Customizable Options:

- Screw type
- Electric
- Chain drive
- Hydraulic
- Manual
- Pneumatic
- Battery

AFI Tanks

- Atmospheric Tanks are ideal for Pharmaceutical, Nutraceutical, Food & Beverage, Cosmetic and Chemical industries
- Reliable solution for storage and transporting your liquids
- Maintains product integrity
- Designed for easy discharge and cleaning

Customizable Options:

- Valve type
- Material type (304/316)
- Finishes
- Mixing & Blending
- Portable

AFI Intermediate Bulk Containers (IBCs)

- Specially designed for Pharmaceutical, Nutraceutical, Food, OEM and other industries
- Enables easy discharge and cleaning
- The stainless steel construction (304/316)
- Helps maintain complete product integrity
- Reliable solution for product blending, storage and transportation

Customizable Options:

- CIP systems
- Valve/ Tilt Discharge
- Production capacity (2-100) cubic ft
- Valve type
- Material type (304/316)
- Finishes

AFI Clean Room Equipment

- AFI custom designs and fabricates Stainless steel Clean Room Equipment

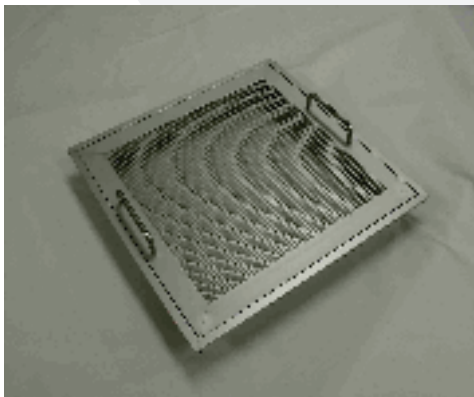

Customizable Options:

- Finishes
- Material type (304/316)
- Size

AFI Clean Room Equipment

- AFI custom designs and fabricates stainless steel clean room equipment

Customizable Options:

- Finishes
- Material type (304/316)
- Size

AFI Clean Room Equipment

- AFI custom designs and fabricates stainless steel clean room equipment

Customizable Options:

- Finishes
- Material type (304/316)
- Size

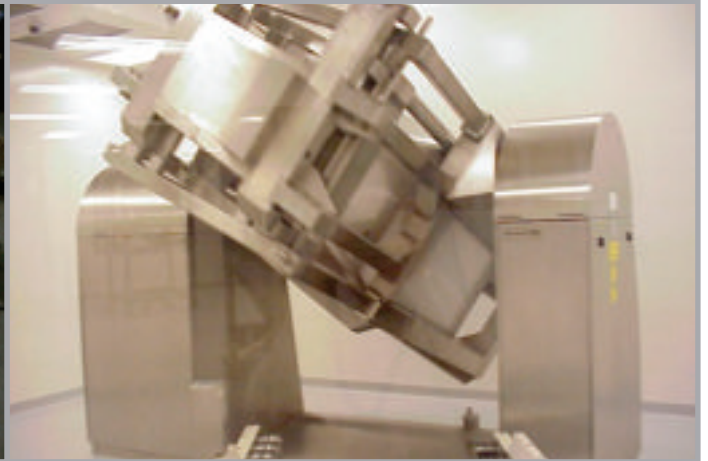

AFI Chutes & Hoppers

- Ideal for Pharmaceutical, Nutraceutical, Chemical, Food & Beverage and Cosmetic Industries
- Constructed to client specific requirements

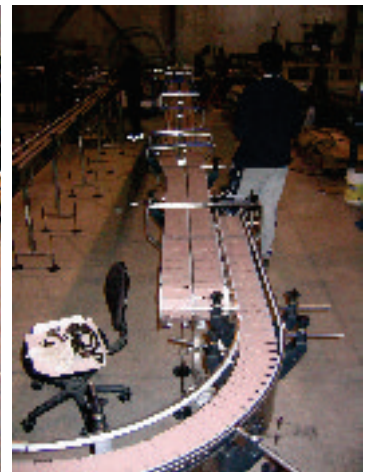

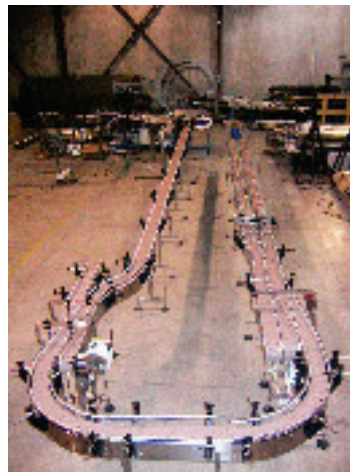

Customizable Options:

- Finishes
- Material type (304/316)

AFI Conveyors

- Ideal for Pharmaceutical, Nutraceutical, Chemical, Food & Beverage and Cosmetic Industries
- Constructed to client specific requirements
- Built to GMP standard

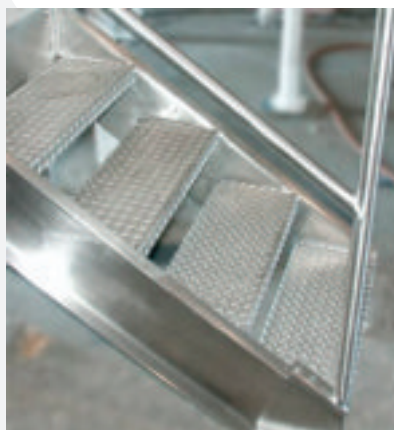

Customizable Options:

- Finishes
- Load
- Belt, Screw or Roller
- Size
- Material type (304/316)

AFI Platforms

- AFI Platforms are manufactured in various sizes as per client specific needs
- Constructed from heavy duty stainless steel tubing

Customizable Options:

- Finishes
- Sizes
- CWB & GMP standards
- Loads
- Material type (304/316)
